

Educational Seminars and Workshops

If you are in search of informative, timely and interesting seminars, we can provide outstanding topics presented by a dynamic speaker. You can select a topic from the list of those we have presented previously, or we can tailor a technology or business topic just for your group. Educational seminars can be specific to club technology for your local CMAA chapter, or can be more general for presentation at a member-related function. Even if you don't need a speaker today, browse our list of CMI Certified technology and business educational seminars for future meeting ideas.
